

WEEK 2:

DATE: 12 Aug 2016

Progress made this week:

- This week we discussed more about the ideas and projects which we have.
- Teams were formed.
- All of our classmates had crazy ideas. Like give blood take blood, flirt alert :D etc. but we all forgot to think in broader perspective.

Goals for next week:

- ★ Have weekly reports in github
- ★ 5 project proposals
- ★ Hands on programming
- ★ For projects ideas look at MIT/STANFORD and how everything is documented.
