

WEEK 4:

Date: 26 Aug 2016

Progress made this week:

- Learned about the requirements engineering and life cycle of software.
- Important factors in development of software.
 - ★ People
 - ★ Processes
 - ★ Tools
 - ★ Products
- Discussed about stakeholders.
- We also listed out the requirements of facebook and later represented them in mathematical/pictorial/graphical form.
- Learned about Eliciting and planning
- Other different models in software development which are derived from the waterfall model.
- Learned how prototyping model plays an important in knowing what actually customer wants.
